

KEEN PUMP

KH Features

1. Replacable bronze impeller wear ring.
2. Efficient non-clogging ductile iron impeller
3. Tapered pump shaft, keyed with lock ring for easy impeller removal
4. Heat exchanger plate, cast iron.
5. Refrigerant coolant in self-contained cooling system.
6. Circulating coolant impeller
7. Dual mechanical seal sealing system, silicon carbide shaft seals
8. Moisture detection, seal leakage probe
9. Stator, Class H insulation, thermally protected on all 3 phases
10. Rotor, stainless steel shaft
11. Cooling shroud, encloses motor & holds self-contained refrigerant
12. Moisture detection probe (secondary wiring compartment)
13. Strain relief clamp for protecting cable
14. U/L power & control cord, stainless steel sealing assembly
15. Cooling shroud clamp plate
16. Heavy duty dual ball bearings, minimum 100,000 hour L-10 life
17. Protective bearing packing seal
18. Pump clean-out port cap
